

Richmond Boakye

Software Developer · Shopify & Web Specialist · Microsoft Certified Azure Developer

Founder of RHB Digital · Östersund, Sweden (CET) · English and Swedish

Profile

I build Shopify stores, business websites and custom software that small businesses can actually run themselves after handover. I'm a Microsoft Certified Azure Developer working mainly in C#/.NET, Shopify Liquid and TypeScript.

I run RHB Digital, a one-person software studio in Sweden. You work directly with the developer who writes your code: no account managers, no outsourcing, clear written updates at every step.

Services

Service	What you get
Shopify store setup and customisation	Theme customisation (Dawn and other free themes), custom Liquid sections, product and collection setup, Klarna and card payments, booking integrations
Business websites	Fast, responsive, multilingual websites with contact forms and SEO basics, built so you can edit content yourself
Custom software and web apps	C#/.NET and ASP.NET Core applications, REST APIs, admin tools and dashboards
Desktop applications	WPF/MVVM tools for internal workflows, records and reporting
Azure cloud and DevOps	App deployment to Azure, CI/CD with GitHub Actions or Azure DevOps, Docker
Automation and AI integration	Replacing manual spreadsheet and email work with scripts, integrations and AI-assisted workflows

Selected projects

Beauty by Lin — Shopify e-commerce and booking (client project)

- Built a responsive Shopify storefront for a Swedish hair and beauty business selling hair collections and braid services.
- Customised the Dawn theme with custom Liquid sections, improved collection browsing and product configuration options.
- Set up Shopify Payments and Klarna, and connected an external appointment booking system so customers move from product to booking in one flow.
- Built in a Shopify Partner development store with a Git-based workflow, then handed over a storefront the owner edits herself.
- Stack: Shopify, Liquid, Shopify CLI, HTML, CSS, JavaScript.

IES EduTrack — student, attendance and grade management

- Desktop administration tool for school staff covering student profiles, attendance tracking, grade entry and report generation.
- Structured with MVVM and a separated service layer so new views and reports can be added without rewrites.
- Stack: C#, .NET, WPF, MVVM.

CashFlowManager — personal finance application

- Desktop app for tracking income, expenses and budgets.
- Stack: C#, WPF.

More work on GitHub, including REST API and library management projects in C#.

Experience

Founder and Software Developer — RHB Digital Solutions, Östersund, Sweden · 2026 – present

- Deliver websites, Shopify stores and custom software for small businesses in Sweden and internationally.
- Handle the full cycle: requirements, scoping, build, deployment, handover and ongoing support.
- Built the studio's own multilingual WordPress site on a custom-coded theme, with no page builder.

IT Representative — Internationella Engelska Skolan (IES), Östersund, Sweden · January 2026– present

- First-line IT support for staff and students across devices, accounts and classroom technology.

Technical skills

Area	Tools
Backend	C#, .NET, ASP.NET Core, Entity Framework Core, REST APIs, Java
Frontend	HTML, CSS, JavaScript, TypeScript, Angular
E-commerce and CMS	Shopify, Liquid, Shopify CLI, Shopify Partner, WordPress (custom themes, PHP)
Desktop	WPF, MVVM
Cloud and DevOps	Microsoft Azure, Azure DevOps, GitHub Actions, Docker, Bicep
Databases	SQL Server, PostgreSQL, SQLite
Workflow	Git, GitHub, VS Code, Visual Studio

Certifications and education

- **Microsoft Certified: Azure Developer Associate (AZ-204)**
- **BSc programme in Informatics, Systems Development** — Mid Sweden University (Mittuniversitetet) ·
- **Master's in Human Geography (120 credits)** · 2022

How I work

1. **Discover** — we agree what the project needs to achieve and who will use it.
2. **Plan** — a written scope, timeline and price before any work starts.
3. **Build** — version-controlled code, progress updates and a preview you can review.
4. **Launch and hand over** — deployment, a short guide to running it yourself, and support afterwards.
